

SIAMON IE

Appealing and reliable?

What perfection!

APPEALING AND RELIABLE

Many people think that the function of a coffee machine is purely to dispense drinks. So what's the excitement about a hard-working, no-fuss, uncomplicated machine?

However, when it comes to the Siamonie "more costs less". Its high-grade work ethic not only brings resounding calm to those it is serving, but also increases turnover in the background.

What can the Siamonie offer you?

Hi-tech at a low price are not just words, but our guarantee. This automatic coffee machine is appealingly reliable. It strikes the right note with international coffee specialties at the highest level. Whether it be a ristretto or an Americano, the quality remains the same.

Well thought-out technology ensures that the machine functions perfectly throughout, without the requirement for complicated operating.

Stylish, reliable and hardwearing: Coffee machines built by vending machine experts.

*Our belief is sell
tomorrow's coffee
today and achieve
greater turnover than
yesterday.*

PERFECTION!

Aesthetically pleasing

Experience its simple design without corners or edges. The high gloss finish comes in a variety of colours. For free-standing units designer rear panels are available. Configure your SIAMONIE to suit you!

A total pleasure

Every hot drink – whether it be a standard cappuccino or fancy speciality coffee – is served every time to the same exacting high quality. You choose your coffee recipes, even create special delicacies. The machine dispenses these time after time, effortlessly, with a simple push of a button or by touching the display.

First-class durability

The SIAMONIE is built with only the finest parts, as used in the HoReCa sector. These components are manufactured from quality materials to withstand the rigours and demands of everyday use.

VARIANTS

CLASSIC

- Weight: approx. 68 kg
- Electrical data: 230 V / 50 Hz / 16 A
- Power: 2.9 kW (2.2 kW as an option)
- Capacity: 250 cups an hour

FUNCTIONS

Grinder

Sturdy design impacts on exceptional functionality. The high-performance, horizontal grinder produces a strong, but nevertheless **quiet grinding process**. The grinding discs (Ø 65mm) process the coffee beans until the required grind level is achieved – from espresso to French Press, for the perfect coffee taste.

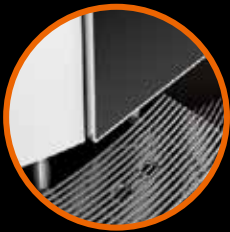

Brewer

The horizontal **Hightech-PEEK-brewer** can accommodate coffee throws from 6g – 14g and boasts an insulated brewing chamber made from high-quality stainless steel. The brewer seals are hydraulically inflated, which are not only hygienic but also virtually maintenance free when in daily use. **Sielaff's pre-infusion technology** provides the highest level of coffee pleasure within the shortest time.

Touch Screen

High resolution, superb picture quality and LED-background illumination – all special features provided by the **7"-touch display**.

Cleaning

Fast cleaning is essential when the machine is in operation: The Siamonie's **quick & easy cleaning process** is fully automated, easy to use and the whole programme is completed in under 12 minutes.

Steam boiler

The **steam boiler** on all Siamonie freshmilk machines is fitted with a filter **as standard**. Lime-forming ions are filtered from the water to provide long-term protection against limescale. Costly servicing and machine down-time have become things of the past.

Selection

Generate a great diversity of drinks with the **Siamonie Touch variants**. A wide range of programming possibilities for personalised recipes and selections on different levels. Additional refinements for every individual product selection provides **hot drinks variants** – to suit "your" taste.

ACCESSORIES

ORIES
